

Excellent power handling and excellent acoustic behaviour.

The Horus 8S subwoofer is an ideal addition to the Horus 6B compact and Horus 11 floorstanding loudspeakers, and is an effective companion to any stereo hi-fi or home cinema system.

It is an active subwoofer with a passive «Down Firing» radiator equipped with a 20 cm active loudspeaker and a 20 cm passive loudspeaker, coupled to a 150 W RMS Class D amplifier.

This process provides deep, punchy bass in a very compact format.

Thanks to the use of a reinforced and nerved cellulose pulp membrane, the active & passive bass drivers demonstrate excellent power handling and excellent acoustic behaviour.

This results in a generous and responsive bass.
